

HIS 'N HAIR

THERE'S NOTHING THAT BRINGS YOUR MAN DOWN MORE THAN HAIR LOSS. HERE'S HOW YOU CAN HELP

Most men equate baldness to ageing, so when hair loss hits them in their youth, it can affect their esteem and – bad news for you – bring misery into your relationship! We can't be having that, so here's what you can do to solve the problem.

The truth is, thinning can occur at any age – we're not talking full-on bald patches, but more discrete thinning at the top and sides. Even though it may be unnoticeable to most people, it can make the sufferer feel self-conscious and upset. Tamwar Aziz from Leicester noticed he was thinning on top shortly after he turned 18. Utterly shocked and feeling embarrassed he immediately started looking for a solution. He reveals: 'I couldn't tell anyone, but I knew I wanted to stop it as soon as possible so it wouldn't get worse.'

After looking into options including re-growth products, he discovered the unique hair systems offered by eMPower Hair Solutions. Different to an ordinary wig, they work by making a copy of your scalp to create bespoke hairpieces that are affixed onto your head to hide the problem area. The systems are made from human hair so can be treated normally – washed, styled and even dyed as you please. Andy Pollard from eMPower explains: 'The concept comes from the Hollywood movie industry where celebrities and stars have been using this secret for years to a retain a natural looking full head of hair - eMPower have adapted this so now everybody can have hair for life!' The systems stay affixed on your head so you don't have to do any maintenance yourself. You simply pop back every few weeks as you would to visit a regular hairdresser who will trim your existing hair and reattach the system. While wigs can become hot and itchy this never happens to systems, they are discrete and handmade to your exact specifications. At your initial consultation a small sample is taken from your hair and this is used to source human hair that's the same as yours so it blends in naturally. Each visit to the eMPower salon takes about 45 minutes, again just like an ordinary hairdressers, the only difference is you are pampered and looked after by an expert stylist who respects your sensitivity while ensuring your hair always looks stylish. Tamwar adds: 'You don't feel a

thing, it's completely painfree and has totally changed my life.'

Hair systems can be created for areas of your head, as in the case of Tamwar who only has a system on top; the back and sides of his head is all his own hair, or they can also be created for whole head coverage for those who suffer from more serious balding like alopecia or for cancer patients undergoing chemotherapy. The company also creates hair extensions for people looking for some extra length or height, whether that's for daily use or special occasions. eMPower hair systems are regarded as the best in the business so it's not surprising that people travel from all over the world to use their services. Men and woman of all ages are welcome. The process starts with a full consultation to alleviate all your concerns. A content Tamwar recommends it: 'I'm so happy with the service and results. My confidence has been restored, and although I'd like to have a full head of my own hair, I know I've got the next best thing.'

Which can only be good news for his girlfriend...

Bare to hair

Step 1 Attending the salon is just like visiting an ordinary hairdresser. Your stylist will begin by assessing your hair and asking you how you want it cut and styled.

Step 2 The head is sprayed with an adhesive remover allowing the system to be peeled off easily.

Step 3 After a thorough clean and shampoo, the hair below where the system sits is shaven to provide a smoother fit and the system is affixed back on.

Step 4 The hairsystem is briefly held in place to allow for the glue to set. It can then be styled as normal using your choice of products be that gel, wax or spray.
